

Bedford & District Cat Club – 25/04/15

Mrs Di Brown

Congratulations to Sally and her team on an excellent show this year with so many quality cats to judge it was an absolute pleasure, my thanks for the judging invitation. Thank you Zoe for stewarding for me, you did an excellent job so I hope you enjoyed your day, and I look forward to the next time

A.V. Imperial Grand Champion Female

What a class! 8 quality ladies, I was so spoilt for choice.

Oly – Burns' OSIGC SUPASOFT SOMATIX TYGALILY (SOL n) F 09/03/10.

Gorgeous showy lady with excellent overall balance. Moderate wedge with very good width between her large broad-based and tufted ears, slight nose break, firm chin, bite a little untidy with a couple of incisors missing but level. Lovely eyes for shape set and expression, outlined in black and with a wonderful shade of rich emerald green. Elegant neck with a firm and muscular body of medium length, long legs and neat well tufted oval paws, long full brush tail to balance. Rich colouring to coat with apricot undercoat and excellent clear black ticking throughout, showing three bands of colour. Shorter over shoulders but otherwise medium in length overall with full ruff and knickerbockers, soft and fine in texture with good density and lying close to body. Excellent to handle and excellently presented.

R – Chapman-Bear's IGRCH CATAMARIAN EVITA (BUR a) F 13/08/10.

Another lovely lady, she ran the winner close. Short wedge, wide at the cheek bones and tapering to a blunt muzzle, gently rounded top of head with good width between broad-based rounded tipped ears of medium size and beautifully set. Slightly rounded brow with good nose break, super deep chin that lines up with the nose tip and a level bite. Wicked expression to eyes of correct shape and set with the preferred golden yellow colour. Medium length body with a lovely firm and well muscled feel to it, slender limbs and neat oval paws, slightly tapered tail with rounded tip to balance. Soft mid blue coat showing the desired silver sheen to the slightly darker face ears and feet, paler underbody, excellent for texture, short satin-like and glossy. Perfect temperament and presented in top condition.

Also considered – Ensor's IGDCH KITTAH ARTEMIS (SBI f) F 10/08/08.

Lovely size and substance to this very attractive lady. Very good head type and her eye colour is excellent. Warm seal points beautifully mingled with rich reds, even mitts to front paws and symmetrical gauntlets to the hind that finish just below the hock. Long silky coat with full ruff to face, minimal for tonal shading Very sweet tempered.

Jamieson's IGDCH HAVENHOUSE ELISE (RAG a 21) F 13/05/11.

Such a pretty girl quite dainty in appearance but deceptively well muscled and weighty. Broad head with flat plane between her nicely furnished ears, good profile chin and bite. Very good eye shape set and colour. Pretty pale blue tabby markings on pale beige agouti ground. Bluish white coat with almost no shading to speak of, medium in length with good density, showing full ruff and pantaloons. Very gentle

Thompson's UK OBIGC CHRISAN KARA MIA (CRX ns 03) F 25/07/08. A lovely elegant girl, she just missed out today and was third in this class. Very good head and ears. Oval eyes perhaps a touch bold in expression, gold in colour. Long lithe body with balancing tail. Perfect coat, beautifully rexed throughout with the silver undercoat peeping out between the black curls that looked like corn rows - very attractive. Excellent to handle

Tegg's IGDCH BLOOMERS BELCHAMPE BROOKS (BUR h) F 02/07/10. I have come across this lady in my class before and she was unlucky again today. A very nice big strong girl with excellent rich warm chocolate colouring and distribution of tortie reds, and gorgeous coat texture. Excellent to handle.

Brock's UK & OSIGC KARAMUSHI TUTI FRUITY (SIA f) F 04/08/07. One of my favourite Siamese ladies, she has the most beautiful eyes although the colour is beginning to fade out a touch with age, she has a slight dip to profile now and has become a little square in the muzzle. That said I still love her, she is still very lovely and has a temperament to die for.

Stokes' UK & OBIGC LITTLEFEAT POWDERFINGER (SIA f) F 05/03/10. Beautiful Siamese lady with excellent head type and ear set, marginal bump to back of skull. Excellent body type, very long and firm toned with good tail. Very dark seal tortie points well mingled on all points and with some good rich red on her ears. A little shy so doesn't show herself as well as she could, but handled well.

Chinchilla & Shaded Silver Kitten

1st BOB w/h – Cohen-Randall's TASHIAMOUR JOYFUL DREAMER (PER ns) M 22/08/14. A lovely kitten for type and nicely developed for his age. Very good head type with neat round tipped and well furnished ears, set wide and low on the skull. Smooth rounded forehead, short snub nose with full brick red nose leather outlined in black, strong chin and muzzle, bite considerably undershot and as he is 8 months old and has changed his teeth I did not feel I could award the BOB today. Round eyes, bold and expressive, colour a promising green outlined in black. Weighty medium length body, has good bone to limbs, short well furnished brush tail. Shading to body and flanks very even and goes a quarter down the hair shaft, face, limbs and top of tail show minimal tipping, pure white chest tummy and undercoat. Coat frames the face well, is full over the shoulders and down the chest, and stands well away from the body with fine silky texture. Excellent show preparation and temperament.

British Orange-Eyed White Adult

CC & BOB – Palme's SKELLUM MYSTICS ICE CUBE (BRI W 62) M 16/05/14. A very young male, immature but not unacceptably so for 11 months, and he has promise. Round head with cheeks coming along nicely, head as yet to broaden but ears fairly small and nicely set. Round eyes fairly open in expression and a lovely mid copper colour. Rounded forehead with a short nose and pink nose leather, firm chin, bite just about level. Adolescent body that was weighty and substantial, short strong limbs and medium length tail with rounded tip. Pristine white coat a trifle long and could be denser but has a hint of crispness to it. Excellent temperament, Mum needs to clean his eyes for better presentation.

A.C. British Colourpointed Neuter

BOB – Berry’s PR HYSSOPUSS SUGAR RUSH (BRI c 21 33) FN 21/05/13. A large cobby girl with very good British type. Round apple head with good width between neat small round tipped ears that are set well. Full cheeks, rounded forehead and short neat nose, firm chin, bite, marginally under. Round eyes with open expression and clear blue colour. Weighty cobby body with short legs and round paws, tail medium in length with rounded tip to balance. Attractive mid lilac tabby markings with clear “m” to brow and evenly spaced tail rings, paler bracelets to limbs. Magnolia coat with medium tonal shading to back, a little long and marginally soft in texture, density could be better but she is changing her coat and beginning to lose hair. Excellent temperament and presentation.

Oriental Black Adult

CC & BOB – Freeman’s MESBELLES GIFT FROM NATUCHE (OSH n) F 07/06/14. A stylish and well balanced girl. Medium length wedge with very good width to top line, and lovely large jug handled ears set to follow. Profile almost straight, just a small bump near the end of the nose, firm chin, bite rather uneven but basically level, small pinch to muzzle. Well defined neck-line and a long slender but firm toned body, long spidery limbs and a long whip tail to balance. Jet black coat, sound to roots, short sleek and close lying with lovely texture. Handled well and was excellently presented

Oriental Longhair Adult

BOB – Hart & James’ CH PIPPASTRO INFAMOUS ECCLES (62 20h) F 22/11/12. A neat and overall well balanced queen without undue exaggeration. Shorter wedge with good top of head, ears just about large enough, neatly furnished and very well set. Oriental eye shape and set with sweet expression and olive green colour. In profile there is a slight dip to nose, chin lines up and the bite is level. An attractive mix of rich red tortie and darker chocolate ticked based shaded pattern, (she shows a skull cap and has narrow banding to her limbs), clear paler undercoat well up the hair shaft. Coat on body good for length but plume only reasonably furnished, overall texture silky and fine. A dear lady excellently presented.

Cambridgeshire Cat Club – 25/04/15

A.C. British Premier Neuter Female

GD PC – Bujlaska-Axon's CH & PR DELPHINIUM SWEATHEART (BRI ns 24) FN 01/04/10. A big strong lady neuter of excellent British type. Round head with excellent full cheeks and beautifully rounded muzzle to complete the picture. Rounded forehead with short broad nose, chin lines up and the bite is level, neat small round tipped ears set wide and fitting the head just right. Excellent open expression to eyes of clear paler green. Short strong neck with a strong cobby body for a female, short limbs large round paws and a medium length tail with rounded to balance. Jet black spotted pattern on pale silver ground, minimal for brindling and tarnishing, some slight linkage to spotting behind the forelimbs but otherwise nicely rounded and they are, impressively for a silver cat, almost sound. Coat marginally long but has good density and crispness to it. Excellent temperament and presentation.

R - Berry's PR HYSSOPUSS SUGAR RUSH (BRI c 21 33) FN 21/05/13. (See Bedford report)

Black Silver Tabby Adult

CC & BOB – Kidd's TEMPESTA ENCHANTINGELEANOR (BRI ns 22) F 19/02/14. An attractive girl of good British type, with good size and development for age. Round head with full cheeks and medium sized round tipped ears set well apart and fitting the contours of the head. Gentle rounded curve to forehead with a short neat nose, chin firm and bite just about level. Excellent open expression to eyes of quite a strong hazel colour. Weighty body a little adolescent rangy at present, short strong limbs and medium length tail. Jet black tabby pattern shows all the key elements, well defined butterfly, three spine lines with central line rather narrow, very large round oysters are almost compete, necklaces to chest, uneven rings to tail, banding to limbs and spots to toes. Coat a little long and soft in texture today but is reasonably dense. An easy girl to handle and excellently presented. I understand this makes her a Champion today, many congratulations.

Oriental Bicolour Adult

CC & BOB – Reed's BLANC NUAGE INVASION (IMP) (OSH F 03 33) F 11/02/14. A very beautiful lady, although her language is somewhat less than lady-like. Super head, very stylish indeed with broad top line and very large wide based ears set wide and flowing the lines of the head. Strong almost straight profile with a firm chin and level bite. Wicked expression to eyes with excellent depth of blue for a Bicolour. Well defined neck with a long very slender body that ideally could have more coverage over the spine but she has probably been calling, long elegant limbs neat spoon paws and a long whippy tail to balance. Attractive seal tortie and white points with tonal shading to body. At first glance she appears to lack the required third white but as she has a large white patch that covers the groin area, along with the white on her face chest limbs and tummy I think she just meets the criteria. Too lovely not to really. Coat length good with close lying texture. Handled well despite her rude words. Champion on the day I understand, many congratulations.
