

## Caesarea CC – 10/10/15

Mrs Di Brown

Thank you Joan for the invitation to judge here again this year, it is was a lovely show and the hospitality was excellent. I was fortunate to have Elinor as my steward, thank you for your company and very good handling of the exhibits and I hope you enjoyed your day as much as I did.

### A.V. Imperial Grand Premier

**OLY - MacDonnell's IMP GD PR AMAROGUE SHALYMAR (SPH f 32) FN 03/11/07.** A good size girl of very good type. Attractive moderate head with rounded contours and high cheek bones, distinctive whisker break with prominent pads. Flat plane to forehead between the ears, slight stop at the bridge of the nose with the remainder straight, firm chin lines up with the nose tip, bite marginally under. Slanted eyes, large and lemon shaped with width between, ears large, wide at the base with rounded tips and set to follow the lines of the head. Well muscled body of medium length, medium length legs with oval paws the later with well cushioned pads. Attractive black tortie pattern with the lightest of "suede" finishes to head body and limbs, just a little thicker fluff to the nose only, and a long prehensile tail. Grumbled a little but handled well. Excellently presented.

### A.C. Oriental Premier

**GD PC – Miller's IMP GD CH & PR PASHTAN RHAPSODY (OSH b) FN 05/08/12.** An elegant Havana female with some very good qualities. Even and well balanced medium length wedge with very good top of head, and large open based ears set in line. Oriental eye shape and set with good expression and mid green colour. Straight profile and firm chin, bite untidy but basically level. Well defined neck and along well covered but still elegant body, long slender limbs, tail needs at least an inch to balance. Rich warm toned Havana coat that was virtually sound, just a tad paler at the roots on the lower sides today, coat short and close lying with, typically for a female neuter, a slightly fuller undercoat. Super to handle and excellently presented.

### A.C. Siamese/Balinese Grand Champion

**IMP – Miller's GD CH JAKURTZI SPELLCASTER (SIA k) F 22/05/14.** A stylish lady. Medium length wedge with very good top of head and large flared ears set wide. Expressive eyes of lovely brilliant blue colour. Straight profile, good chin and level bite. Well defined neck with a body that is slightly lean but overall she is a good weight, persistent calling perhaps? long elegant limbs and long whippy tail to balance. Attractive blue-based caramel points with plentiful apricot mingling particularly in the ears, off-white coat with minimal tonal shading, good for length but rather soft and fine in texture. A friendly girl, excellently presented.

### A.C. Siamese/Balinese Grand Premier

**IMP – Laffoley's GD PR ATLANTIC BOUDECIA (SIA g 21) FN 05/11/07.** A well balanced girl overall with good type and style. Medium length head with good width to top line, ears in proportion and very well set. Profile straight, chin lines up well but bite marginally over. Oriental eye shape and set with good expression and

bright mid blue colour. Well covered body of good length with long limbs and tapered tail to balance. Points pattern shows an even balance between tortie and tabby with clear scarab to mask, multi bracelets and tail rings, cream mingling rather hot in tone but shows on all points, not entirely sure she is a blue, she is quite a muddy tone in places, which in conjunction with the hot cream is suggestive of caramel, but her paw pads are almost the correct colour for blue and she is an older lady. Wonderful coat texture, beautifully sleek and close some medium shading overall to tone. Super temperament and excellently presented.

#### **A.C. Siamese or Balinese Premier**

**1st GD PC w/h – Miller’s PR PASHTAN SNAGGLEPUSS (SIA b 21) MN 24/03/14.** A very dear boy, I have given this chap a PC in the past but felt at the time that that was his level bless him. Longer wedge with top of head needing more width, ears very large and fairly wide at the base, but set rather close and with a tendency to tilt sideways. Strong profile with good chin and level bite. Oriental eye shape and set but colour needs more depth. Elegant and well toned body for a neuter with long limbs, tail needs at least an inch to balance. Darker but warm toned chocolate tabby points, very well marked with good “m” to brow, large thumb prints and darker lynx tips to ears, multi bracelets and very well ringed tail. Coat more white than ivory in colour with very little shading apart from some evidence of plucking in the past, with darker patches over the lower back, length and texture good. A little shy but handled well and was excellently presented.

#### **British Blue Kitten**

Two very nice babies – but a bit of a faux pas on my part as the second placed baby turned out to be a male, which I didn’t notice but it would explain why he was so much bigger.

**1<sup>st</sup> & BOB – Le Monnier’s MARDENKA MARLEE (BRI a) F 03/07/15.** Has slightly better head type than her brother, perfectly round with lovely chubby cheeks for a baby and neat small ears set well apart. Round eyes with very good expression and a deep muddy colour that promises to be good when it has finished developing. Short nose with firm chin and level bite, round smiley muzzle. Cobby baby body with short legs and round paws, tail with rounded tip to balance. True British blue colouring showing some kitten guard hairs a present but sound to roots and it was really dense and short with a hint of crispness. Sweet tempered and friendly, excellently presented.

**2<sup>nd</sup> - Le Monnier’s MARDENKA NORRIGAN (BRI a) F 03/07/15.** A well grown kitten of good type. Round head with good cheeks, ears medium in size at the moment and needs to grow into them but with good width between, rounded forehead and short fairly broad nose, good chin and level bite, teething pinch squaring off his muzzle a little today. Eyes round and open in expression with muddy toned orange colour at present. Cobby and weighty body, short strong limbs and very large round paws, - going to be a big person by the look of it, tail to balance. Darker blue coat rather unsound and baby long and soft in texture. A sweet boy – my apologies for not noticing his different bits. Excellently presented.

#### **British Blue Neuter**

**PC & BOB – Robbins’ MARDENKA MORANIS (BRI a) MN 12/07/14.** A nice big lad of good British type, well developed for 15 months. Quite a strong round

head with good breadth to skull and small ears set well apart, full chubby cheeks and well rounded muzzle, good chin and bite. Round eyes with open expression and very deep gold colour. Short strong neck, body still a touch rangy but really weighty and substantial, super short strong legs, tail with rounded tip a bit short for balance. Mid blue coat marginally tipped in places but otherwise blue to roots, perhaps a touch long but dense and with some crispness of texture. Excellent temperament and presentation.

#### **Black Silver Tabby Neuter Male**

**PC & BOB – Le Monnier’s GD CH COUNTRYSTYLE SILVER IDOL (BRI ns 22) MN 03/08/06.** A super chap, excellent for type and size, and still retaining his strength and masculinity. Strong round head with full cheeks and excellent breadth to skull with his neat small ears set to follow the contours of the head. Short broad nose with firm chin and level bite. Round eyes, very expressive, with gooseberry green colour. Short strong neck, body very cobby and well muscled with broad chest, stands really low on short strong limbs, tail medium in length to balance. Well defined black tabby pattern showing good facial tracings, butterfly over shoulders, three even and evenly separated spine lines with large matching oysters to sides, on a pale minimally brindled silver ground, just a touch of tarnishing to the muzzle evident. Coat perhaps a little long but has good density and crispness. Perfect temperament, handled really well and was excellently presented.

#### **Black Silver Tabby Female Neuter**

**PC – Larbalestier’s MARDENKA MISTLETOEANDWINE (BRI ns 22) FN 26/12/14.** A big strong girl of good type. Head well rounded with good width between medium sized ears that were nicely set. Gentle curve to forehead with fairly short nose, chin firm and bite level, well rounded muzzle. Open expression to eyes of hazel green. Strong weighty body albeit a touch rangy as yet, short legs and medium length tail with rounded tip. Good clear black tabby pattern on mid silver ground, good butterfly, spine lines and oysters, some tarnishing evident to muzzle and forepaws. Coat a little long but is reasonably dense and has a hint of crispness to it. Excellent temperament and presentation.

**2<sup>nd</sup> – Larbalestier’s MARDENKA MISSYCHRISTMAS (BRI ns 22) FN 26/12/14.** I actually preferred the head type of this lady, but she doesn’t have the size of her sister and has a pattern anomaly, thus the 2<sup>nd</sup> placing. Quite dainty overall, even given her age, but very good for type and balance. Round apple head with full cheeks and small neat round tipped ears set well apart, short neat nose, firm chin and level bite with well rounded muzzle. Round eyes with very good expression and hazel colour. Body is compact with good weight for size, short quite dainty legs and neat paws with medium length tail to balance. Jet black tabby pattern, she does show all the key elements, although the butterfly finishes almost halfway down the back rather than at the base of the shoulders, however there is a wide break of silver ground across the back before the spine lines begin which is not correct. Coat length okay but rather soft in texture and could be denser. Sweet tempered and easy to handle.

#### **Ticked Tabby Neuter**

**PC & BOB – Woolfenden’s PORTEOUS RING THE BELL (BRI a 25) FN 09/04/09.** A huge lady neuter, very cobby and substantial overall. Strong head for a female, round and broad in the skull, ears medium in size and set well, good full

cheeks, just marginally square in the muzzle, very short nose and firm chin with bite a touch under. Excellent expression to eyes of deep gold. Big strong body, very cobby and weighty, short strong boned legs and large round paws, tail to balance. Mid blue ticking showing two clear bands with bluish fawn ground about a third the way up the hair shaft, narrow banding to limbs, one or two necklaces to chest and narrow rings to tail. Coat a touch long a soft in texture but very dense. Handled well and was excellently presented.

**Havana Neuter**

**BOB - Miller's IMP GD CH & PR PASHTAN RHAPSODY (OSH b) FN 05/08/12**

**Tabby Point Siamese Adult**

**BOB – Miller's IMP GD CH MAFDET QUICKSILVER (SIA n 21) M 15/09/13.**

A very stylish male, but seemed a touch out of sorts today. Longer typy head with very good top line and very large flared ears set wide. Oriental eye shape, setting rather deep and it tends to make his eyes look a little small, with colour difficult to assess, but they appeared to need more depth. Strong profile and good chin with level, albeit untidy, bite. Well defined neck-line with long body that needed more coverage over rather prominent spine today, but otherwise he has good weight for size, long slender limbs, good tail. Dark seal tabby points with slightly blurred scarab, paler bracelets and good tail rings. Pale beige body colour with a fair amount of tonal shading but still has a reasonable amount of contrast, coat short but a little soft in texture. A sweet tempered boy excellently presented.

**Tortie Point Siamese Adult**

**BOB - Miller's GD CH JAKURTZI SPELLCASTER (SIA k) F 22/05/14**

**Tabby Point Siamese Neuter**

**BOB - Laffoley's GD PR ATLANTIC BOUDECIA (SIA g 21) FN 05/11/07**

**END OF REPORT**
